

***Are you currently using an EtG test by LC/MS/MS?
Are you managing a Zero-Tolerance program?
Are screening, non-quantitative results sufficient
for your program?***

**If you answered “Yes” to any of these questions,
call our Sales Department Today at 1-800-442-0438.**

***You may be able to save money by adding
or switching to our Immuno-EtG Screen!***

Inexpensive 80-hour*

Alcohol Screen

Immuno-EtG (Ethylglucuronide)

**Immunoassay screen with 500 ng/mL cutoff
*Results take 24 hours or less from receipt at Lab!***

Ethylglucuronide (EtG) is a sensitive biomarker of ethyl alcohol (ETOH) exposure;
a low-level positive EtG could result from sources other than beverage alcohol.

**Published studies have shown EtG may be detected up to 96 hours,
depending on quantity and frequency of exposure to alcohol.*

Confirmations are always recommended and available by LC/MS/MS at a discounted rate!
